aXs Info, Inc.
Phone: 770-316-2646
sales@axsinfo.com
www.axsinfo.com

aXs Info Solutions help the construction industry by managing the flow of documents. Each project worked on and completed, has various documents that need to be handled and collaborated with. Our solutions allow you to capture, retrieve, and manage these documents. Whether they are contracts, quote and proposal forms, site photos, CAD drawings, building material orders, billings, or any other document they will be securely stored in an electronic repository that can be instantly accessed through intelligent searching.

Bamboo Solutions Corporation

Emily Bien
Phone: 703-964-2018
Fax: 703-481-6319
emily.bien@bamboosolutions.com
www.bamboosolutions.com

Extract attribute values from user defined blocks in an AutoCAD DWG file into list properties of a SharePoint document library, allowing view and search on metadata. The DWG Parser Solution Accelerator uses a server side service and Web Parts to allow the user to define the attributes to be extracted from a title block and the SharePoint document library properties to be populated when the DWG file is added to the repository. This automatic extract of title block attributes aids viewing, searching and eliminates manual data entry error.

Depiction Software
"Visualize The Difference"
Phone: 818-707-4451
Fax: 818-874-9451
sales@depictionsoftware.com
www.depictionsoftware.com

One of the greatest challenges facing decorative concrete and paving contractors is conveying what a decorative concrete or paving job will look like with only a brochure, picture book, or sample boards. Now you can help your customers visualize changes with Deco-Con Imaging software. Images created enable you to "virtually" show your customers—in just minutes—endless choices of stamped or stenciled concrete, acid stains, epoxy chips, countertops, or pavers and how it will look, on their home or business, as if you had already installed the job. Depiction Software has also offers Deco-Con Estimating software, Contractor Websites, and Online Visualizers, developed for both contractors and manufacturers.

sales@ferrell.net
www.constructionimaging.com

We work with contractors who are overwhelmed with documents and provide software to manage these documents. Typically, if someone is going to use our software, it is because they want to reduce the amount of time their staff spends on handling documents. Basically, they're tired of searching through files, boxes, and desk drawers to find what they need. They want to have all their company documents at their fingertips (such as Contracts, Invoices, Change Requests, Change Orders, etc.) There's a trend in construction—contractors realize that managing documents electronically can save a lot of time and money. Call us today if you are experiencing these issues.

Fax: 330-220-1443
tak@foundationsoft.com
www.foundationsoft.com

Endorsed by CPAs, industry professionals and contractors alike, FOUNDATION for Windows job cost accounting, project management and scheduling software has helped thousands of construction businesses improve their financial practices. Known for ease of use and robust reporting, FOUNDATION utilizes the powerful Microsoft SQL database, allowing complete user control, unlimited flexibility, increased security and seamless integration with third-party products. Multiple job cost reports, such as production reporting, work in progress, variance and over/under billings can be created instantly. Items like AIA's, certified payrolls, union reporting and workers' compensation are easily accomplished. Additionally, user-definable drill downs can address the reporting needs at numerous levels for various departmental needs.

FOUNDATION comes standard with Job Cost, Payroll, Accounts Receivable, Accounts Payable, General Ledger, CPA Audit/Review and the DataGenie series of customizable report and form designers. Add-on modules include Project Management/Document Control, Scheduling, Equipment, Inventory, Time & Material Billings, Unit Price Billings, Fixed Assets, Executive Management and Consolidated General Ledger. The system also integrates with third-party applications such as estimating, timekeeping, and handheld devices.
